Jim: I just had a discussion with our REOC management in Dallas.... They want me to let you know that they've pulled together a revised staffing number relating to the Demob schedule we provided you earlier today....EPA expects to increase the number of personnel to 154 by September 11, 2017 (up from the current 96). We provided this same estimate to our Congressional Liaison earlier today too.

I apologize for this late change in the numbers but, as you know, in this stage of the response, EPA typically is going up in numbers, not down. A good example of this is the fact we are just now entering the Beaumont-Port Arthur area and will be staffing up to handle our ESF-10 duties there over the next week or two as the floodwaters recede.

Again, apologies for this late change in our estimate.... Just let me know if you have questions or would like to discuss.

Thank you.

The word back from the Dallas office is that 100% of all listed personnel are under the MA for ESF 10.

Let me know if you want to discuss. thanks.

Thanks very much Mike. We presume that most of those folks are working under EPA's own authorities and tracked in the ESF-10 IAP. Is that a correct assumption? Also, approx. how many of the total force you captured on your form are working under the MA?

Thanks,

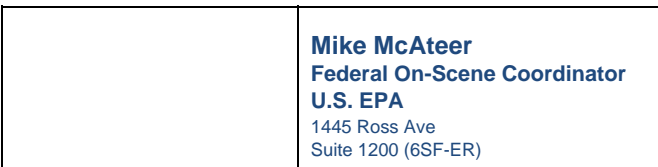

Jim

Mike,

Using the attached template, below will be the format we are using to prepare today's required demob report for the Ops Section Chief and FCO. Your resource types (primarily Fed On-Scene Coordinators) should be pretty straightforward, however as discussed your pollution response numbers are going up so understand that 'demob' will not be your net result. If you need to clarify anything, either myself or ops planner Brian Formanek (202-664-7159, cc'd above) are POCs. This is high priority for us today per the Ops Chief. We'd like to have the inputs in by 1400 today. If slipping past that we'll need a call to discuss please. I'll be sending a similar request to USCG for their ESF-10 stuff.

Thanks!

Jim
